

Criteria for calculating estimated due date by LMP or ultrasound

If date of last menstrual period known

280 days from first day of LMP if regular 28 day cycle

Ultrasound adjusted LMP

If first US performed between **6 weeks and 13 weeks**,
use US date if **> 5 days** difference from LMP

If first US performed between **14-24 weeks**,
use US date if **> 10 days** difference from LMP

If LMP not certain, or cycle irregular,
use US date if performed up to **24 weeks** gestation

If LMP certain, menses regular and first US **> 24 weeks**,
retain LMP date

US, ultrasound, LMP, last menstrual period
