This program is based on fetal weight equation proposed by Hadlock et al. [Hadlock FP, Harrist RB, Martinez-Poyer J. In utero analysis of fetal growth: a sonographic weight standard. /Radiology/ 1991;181(1):129-33.] and adapts the customization proposed by Gardosi et al. [Gardosi J, Chang A, Kalyan B, Sahota D, Symonds EM. Customised antenatal growth charts. /Lancet/ 1992;339(8788):283-7]. Technical details are described in the Appendix to Mikolajczyk, Zhang, Betran, Souza, Mori, Gülmezoglu, Meriadi. A Global Reference for Fetal/Birth Weight Percentiles /Lancet/2011. The standard deviation of birthweight originally presented in the light green field above is derived from the 2004-2008 WHO Global Survey on Maternal and Perinatal Health.
